<b>(54) Title:</b> IMMOBILIZED LABELING COMPOUNDS AND METHODS		
<b>(57) Abstract</b>  The invention includes methods and compounds for labelling conjugates with metals which comprise the steps of coupling the conjugate to a support surface; introducing a complex-forming metal to the support; and collecting the metal-conjugate complex released from the support. The metal catalyzes cleavage of the conjugate from the support upon complex formation resulting in a solutions substantially free of unlabeled conjugate.
